BATMAN

THE MOVIE

INSTRUCTION MANUAL

PORTED BY JAJABINX35

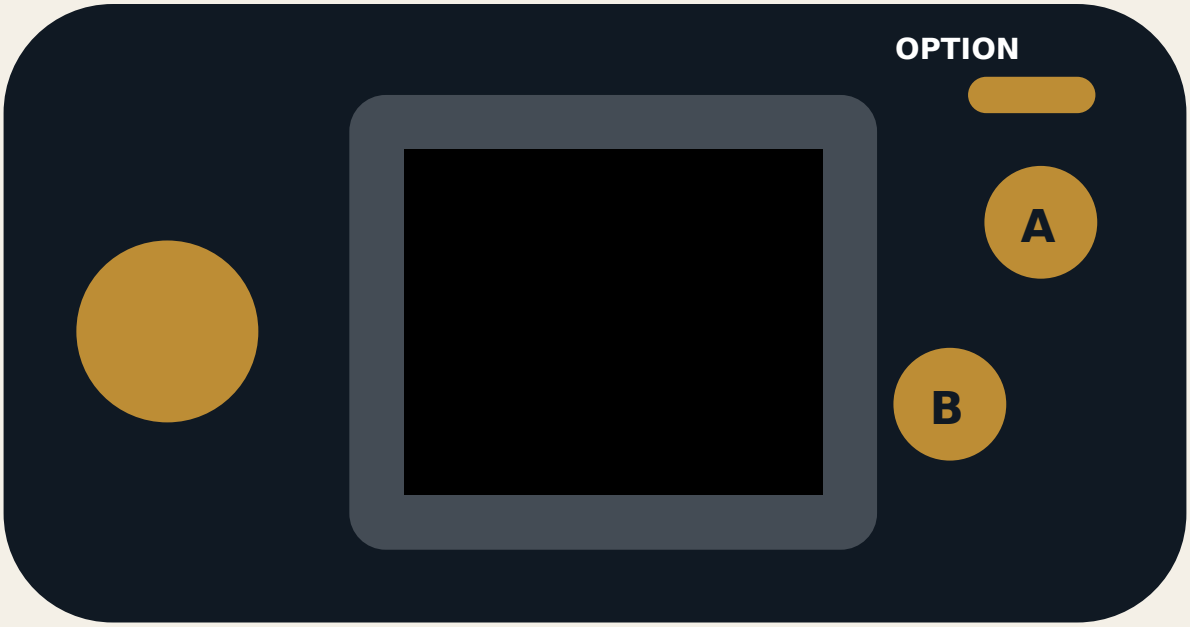

YOUR MISSION

Gotham is under threat. Take Batman from the danger of Axis Chemicals to the streets, skies and rooftops of the city. Drive the Batmobile, solve the Batcave mystery, pilot the Batwing and climb Gotham Cathedral to confront the Joker.

INSIDE THIS BOOKLET

Controls and getting started	**03-04**
Five stages of action	**05-09**
The screen and scoring	**10-11**
Saving, records and QR	**12-14**
Credits	**15**

THE DARK KNIGHT

D-PAD	Move and climb
A	Throw a batarang
B	Use the grapple
DOWN + B	Downward / drop action
OPTION	Pause the game

Platform controls apply to Axis Chemicals and Gotham Cathedral.

GETTING STARTED

NEW GAME begins a fresh run. CONTINUE appears when a saved checkpoint is available. OPTIONS lets you change sound and starting lives. RECORDS holds your scores; CREDITS plays the full music and picture sequence.

Start with three lives or fewer to qualify for records. Use Up/Down to choose and A to select; B returns from a menu.

AXIS CHEMICALS

Stay alert among the factory platforms. Climb, jump and use the grapple to reach higher ground. Throw batarangs at threats ahead. Down+B performs the original downward/drop action.

THE BATMOBILE

Steer with Left/Right. Up/Down controls acceleration and braking. Use A or B with Left/Right to grapple at the appropriate route markers. Watch the road signs and other traffic.

THE BATCAVE

Identify the three products before time runs out. Use the D-pad to select and A or B to choose. You have seven guesses. Study the feedback from each attempt before trying again.

THE BATWING

Fly and steer with the D-pad. A or B fires; combine a fire button with Up/Down for throttle control. Destroy the balloons while avoiding danger over Gotham.

GOTHAM CATHEDRAL

Climb toward the final confrontation. Platform controls return: A throws batarangs, B grapples and Down+B performs the downward/drop action. Keep an eye on your health and the route above.

THE GAME SCREEN

HP	Your remaining health.
PTS	Points earned in the current run.
BEST	Your highest recorded score.
TIME	The stage countdown.
LIFE	Lives remaining, including this life.

POINTS AND TIME

Your score starts at zero and rises with the original gameplay awards. Clear a stage to add a speed bonus: 100 points for each unused second of its scoring allowance. Waiting never removes earned points.

Axis Chemicals	**8 minutes**
Batmobile	**5 minutes**
Batcave	**1 minute**
Batwing	**3 minutes**
Cathedral	**12 minutes**

Example: clear Axis Chemicals in five minutes: three unused minutes give an 18,000-point bonus, plus your gameplay points.

Only active play counts toward this bonus clock. Pauses, menus, loading and cutscenes are excluded. Game over records eligible earned points, even on a partial run. Maximum score: 999,999.

SAVING YOUR GAME

Press OPTION to pause. Select an item with Up/Down, then press A.

RESUME

Return to the action.

SAVE

Store the current checkpoint.

RESTART STAGE

Restart this stage; run time continues.

MAIN MENU

Leave play and record earned points.

Completing stages 1-4 automatically saves the next stage. After switching off and on, choose CONTINUE. Wait for the save confirmation before switching off. Finishing stage 5 stores your result and ends that saved run.

MAKE YOUR MARK

Earn a positive eligible score, then open RECORDS and select UPLOAD BEST SCORE. A completed game is not required.

EDITING INITIAL 2

Left/Right: choose an initial.
Up/Down: change its letter.
Hold A + Up/Down: scroll faster.
OPTION: generate your QR code.
B: go back.

Scan the displayed QR with your phone. The game code is BATMAN. Online submission depends on the leaderboard service being available.

A FRESH CHALLENGE

Reset Records asks for confirmation. Press A to clear your best and last scores, or B to cancel. The reset is saved; upload is unavailable while your best score is zero. Your game checkpoint is kept.

EXTRA OPTIONS

At the main menu, rotate the control stick clockwise through ten full turns to unlock cheat options. The options include invulnerability, frozen stage time and level select.

Unlocking cheats makes the run unranked, even when the individual toggles are OFF. Cold restart and begin a fresh normal game to qualify again.

Starting with more than three lives also disables points for that run. Extra lives earned normally during play are allowed.
